# Downloading Your OneDrive Content

In order to do a backup of your OneDrive content, you need only to select the folders and files you would like to keep and press "Download." This will create a .zip file with all the content.

1. Select the OneDrive cloud icon from your menu bar (☁).
2. Choose "View Online"
3. Select the folders/files you would like to keep and choose "Download."

4. Save the files in your desired location.
